

FEATURED PROJECT | Hospital Fountain

As part of the plan to include a healing natural environment in the new Florida Hospital Ormond Memorial Medical Center, Realstone Systems Copper Shadowstone was used in the construction of an outdoor dining area. To achieve the intricate waterfall look, every second panel had to be cut at an angle to make the radius curve. Jim Doane of Jimbo's Creative Masonry, instructed the installer on how to construct the curve and make the angle at the corner of the wall to create this intricate look. The ease of working with the Realstone System and the close interaction of the dealer and installer made this project a resounding success.

PROJECT :	Florida Hospital Ormond Memorial Medical Center outdoor fountain eating area
LOCATION :	Daytona Beach, FL
PRODUCT :	Copper Shadowstone
DEALER :	Jimbo's Creative Masonry, Inc.
