

EXTERIOR STUD WALL (METAL LATH) WITHOUT PRESSURE EQUALIZED RAIN SCREEN (SECTION)

DRAWING DESCRIPTION:

THIS DETAIL ILLUSTRATES THE REALSTONE SYSTEM INSTALLED WITHOUT A PRESSURE EQUALIZED RAIN SCREEN CAVITY IN THE WALL. A WALL WITHOUT A RAIN SCREEN CAN RESULT IN MOISTURE BEING TRAPPED INSIDE THE WALL, CAUSING POTENTIAL MOISTURE DAMAGE AND MOLD. MOST CONTEMPARY WALL SYSTEMS USE THE RAIN SCREEN TECHNOLOGY. IT IS IMPORTANT TO NOTE ON THIS DETAIL, THAT THE SHEATHING AND METAL LATH CAN BE REPLACED WITH CEMENT BOARD (SEE D-11). THE AIR BARRIER REMAINS IN BOTH CIRCUMSTANCES. CEMENT BOARD COULD SIMPLIFY THE WALL SYSTEM AND REDUCE THE MATERIALS USED.
