REALSTONE GREEN

Realstone Systems is green by design. Our all natural stone was created over thousands of years. At Realstone Systems we hold these natural treasures in the utmost regard which is reflected in our commitment to provide environmentally responsible products. With our revolutionary panel system, we offer a product which is not only beautiful, but also good to the earth and the end user.

Realstone uses reclaimed stone. For our Realstone panels we use the waste stone by-product from existing quarries cutting it into usable end product. Since this stone would normally become waste, utilizing it eliminates the waste of resources and creation of additional waste.

Realstone minimizes the amount of natural resources used. Our revolutionary system of natural thin stone veneers reduces the amount of actual stone used in a project, further preserving natural resources. In addition, the panels light weight reduces the need for additional structural requirements.

Realstone is a natural stone product. In contrast to man made stone products which use large amounts of natural resources during the manufacturing process, our stone is made by nature.

Realstone uses VOC free and ISO 9001 compliant adhesive. We use adhesives which are 100% free of Volatile Organic Compounds. We are committed to providing products for a cleaner environment free of air contaminants harmful to both installers and consumer.

GREEN AWARDS

In May 2009, Realstone Systems was part of the project which won the 2009 Green Building Award from the National Association of Home Builders.

GREEN PRODUCT FEATURES

- Possible Leed Points
- Natural stone
- VOC free adhesive
- ISO 9001 compliant adhesive
- Reclaimed stone
- Preservation of limited natural resources
- Reduced Structural Requirements
- Sustainability

LEED CREDIT

Realstone Systems is a great way for new construction and renovation projects to gain the points they need for LEED certification. Here are some of the ways we may be able to help you gain points.

LEED™ CERTIFICATION CREDIT		
Recycled Content (MR)		
4.1	1 point *	Realstone Panels contain pre-consumer recycled content.
4.2	1 point*	
Construction Waste Management (MR)		
2.1	1 point*	Realstone is a relatively small and extremely durable product, making it easy to divert from the waste stream and implement into a construction waste management plan required to gain these LEED points
2.2	1 point*	
Air Quality (EQ)		
4.1	1 point*	Low emitting materials. Realstone adhesive is VOC free – contributing to a cleaner environment free of air contaminants harmful to both installers and facility occupants.
4.2	1 point*	
Innovation in Design (ID)		
1.1	1 point*	Realstone can help provide the opportunity for projects to be awarded points for exceptional performance above the requirements set by the LEED for New Construction Green Building Rating System and/or innovative performance.

* Possible point toward attaining LEED credits.
