Protect

Stone, tile, masonry and grout can vary in porosity. If not properly treated with a protective sealer, water, oils and other liquids can easily penetrate, leaving unsightly stains that damage the surface. STONETECH® protective sealers penetrate into the surface to ensure stone, tile, masonry and grout are ready for everyday use.

Clean

When cleaning stone, tile, masonry and grout it's important to use cleaners specially formulated for those surfaces. Many general purpose cleaners contain acidic and alkaline ingredients, abrasives, or ammonia that can break down sealers and damage stone surfaces. STONETECH® cleaners are carefully formulated by scientists who understand how to care for stone and tile surfaces. Choose from daily cleaners or heavy duty, problem solving solutions.
