Contemporary Waves

Contemporary waves

Blending Mediterranean charm with the design and inspiration of Moroccan craftsmanship, Kilim offers a sensory narrative of shapes, colours, and textures. Drawing inspiration from zellige, traditional Arabic glazed tiles, Kilim pays homage to the aesthetics of kilim rugs through small-format tiles evoking their geometric, symbolic, and narrative features. Each tile forms the warp and weft of uniquely crafted patterns, each arrangement an act of creation.

Infinite Combinations

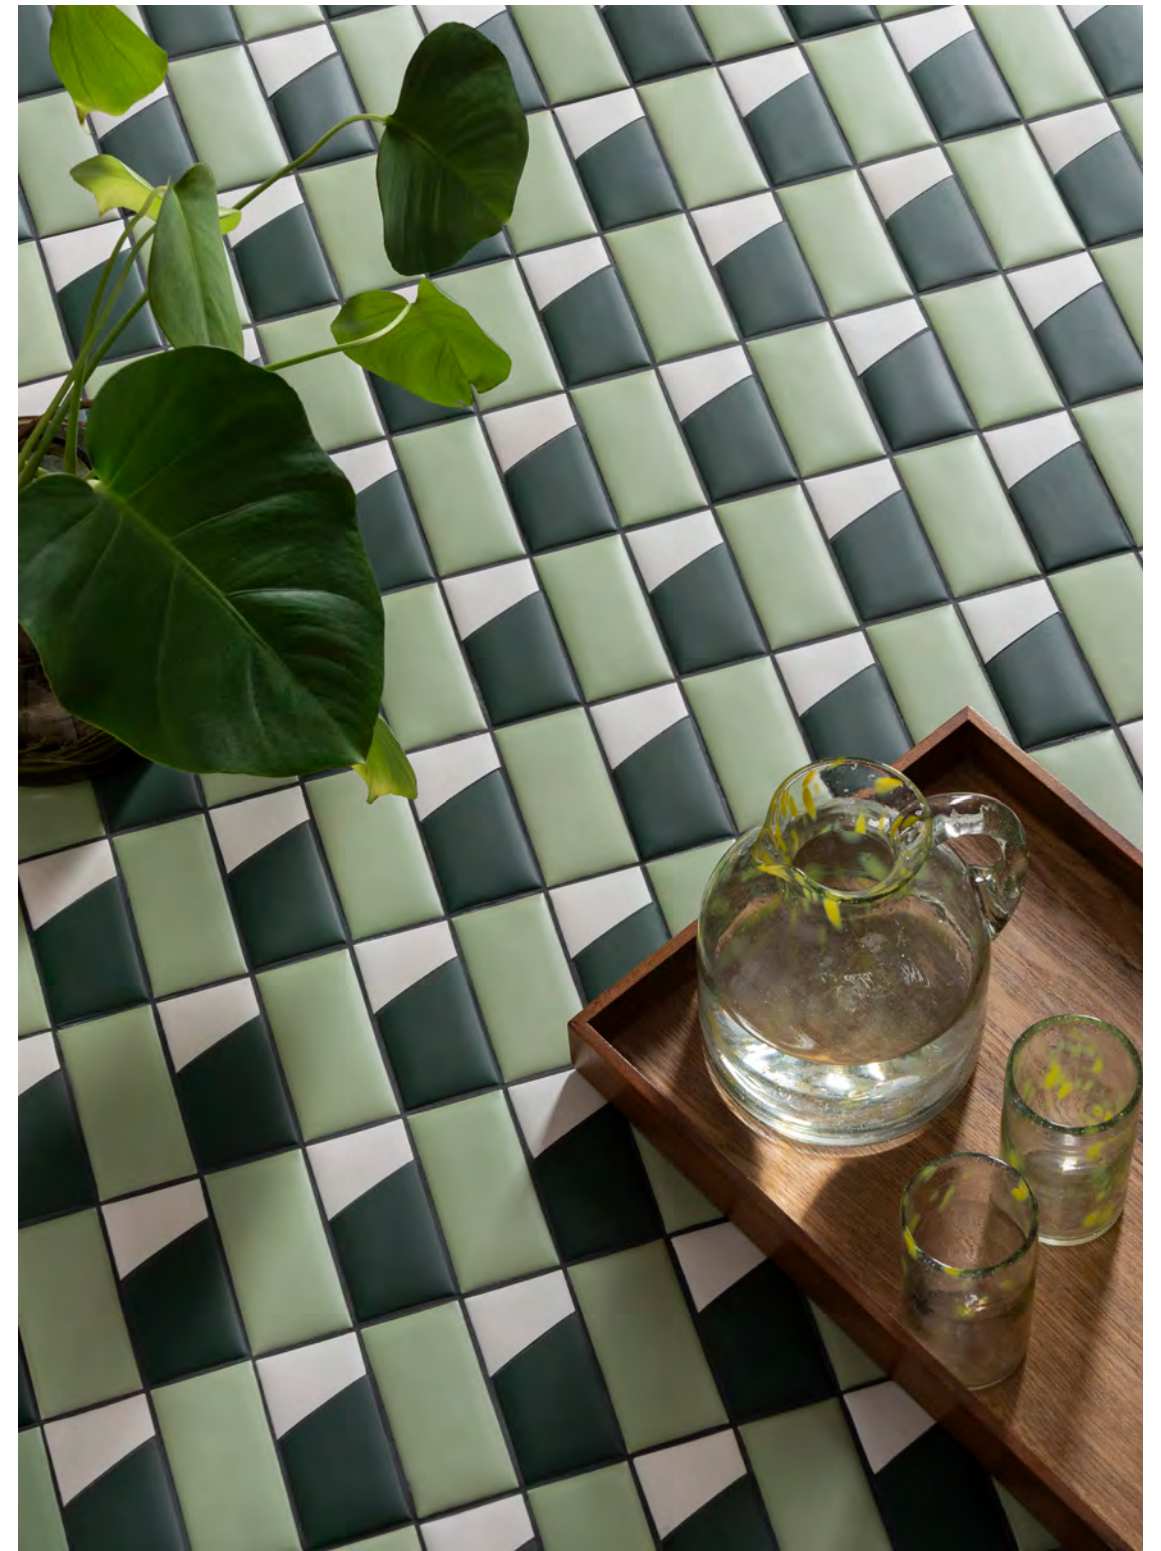

Infinite creative combinations

Versatile and radiant, KILIM is a collection designed to offer architects, designers and interior designers a creative tool with infinite potential. Not just flooring and wall coverings, creativity goes beyond predefined boundaries to give life to unique furnishing elements. Two sizes, two finishes, one pattern and nine colours, all to be 'woven' like the threads of a real kilim, to give shape to environments rich in emotion, identity and cosmopolitan charm.

An abstract photograph featuring sharp, geometric shapes in a deep red color. One shape is a matte finish, while another is a glossy finish that reflects the surrounding environment, including the other red shape and the white background. The composition is set against a light blue-grey background, with soft shadows and highlights that emphasize the three-dimensional quality and the interplay of light and reflection.

A play of reflections and light

A play of reflections and lights

The dual finish, Matt and Glossy, amplifies the possibility of creating textures that appeal to the senses: the tactile and visual contrast between surfaces creates unusual combinations, in a continuous interplay of reflections and opacity.

The Glossy finish is rich, lush and luminous, while the Matt finish is intense, full and rigorous: the colour reveals its dual nature, to be combined or chosen as desired.

Can the simplicity of a diagonal cut generate decorations with unrivalled creative power? **Khat**, which in Arabic means 'line' or 'stroke', is an element designed to be rotated, combined and directed according to the designer's intuition to create contemporary, elegant and surprising patterns. The cut piece and its inverse, each perfectly integrable with the other elements of the collection, are creative accents that make every imagined design possible.
